Thank you for a great turnout at our first monthly meeting of the year, the feedback I received was very positive. Thanks to the panelist, Tim McDonald, Majid Samarghandi and Mike Trimbach, for covering a wide range of topics that impact our industry - Construction Documents, BIM, Energy Efficiency and 2012 Construction Outlook. A small group of us also had a great time at the 1st monthly ASHRAE golf league; hopefully it will be warm enough for 9 holes so if you would like to join us please send me an email.

The ASHRAE board has worked hard to setup the remaining monthly meeting programs and joint events with other organizations such as the Cincinnati Chapter of the US Green Building Council and the Tri-State Society of Healthcare Engineers. Please take a look at the updated calendar in this newsletter. We hope you can join us at the monthly events, and please invite your colleagues, customers and anyone else that will get value out of the meeting topics and discussions.

November 8th Meeting Announcement – “What’s Available at the Boiler Room Superstore” Presentation by Duane Rolkosky, Regional Vice President, CleaverBrooks

We will be having our second Chapter meeting in next Tuesday Nov. 8th from 11:30 – 1pm at the Crowne Plaza in Blue Ash. Duane will present an overview on the newer boiler products and associated controls enhancements in the industry for steam and hot water boilers over the last 5 – 7 years. This is a great way to get up to speed on new boiler technologies over lunch.

New for 2011-2012 Cincinnati ASHRAE

- *Apple IPAD or \$500 CASH Giveaway* – We will give each monthly meeting attendee a raffle ticket and at the end of the year we will pull a ticket to award the winner. We hope that it helps to increase attendance at our monthly meetings
- *Cincinnati ASHRAE Golf League* – After our monthly meetings you are cordially invited to join other members for 9 holes at Blue Ash Golf Course (weather permitting). It is an excuse to play every month and reduce your handicap! Please RSVP to me if you plan to attend, so I can give the course a tentative headcount before we arrive at the course. There is no commitment to attend every month, just let me know if you want to play and we will get you paired up with a group. Regular green fees apply, so if you want to play 18 holes you are welcome to do that as well. We will tee off around 1:30. WEATHER FORECAST LOOKS GOOD FOR GOLF!

Best Regards,

Mike Mattox

Duane Rolkosky – CleaverBrooks “What’s Available at the Boiler Room Superstore?”

Summary

- Regional Vice President for Cleaver-Brooks, the world’s largest producer of steam and hot water boilers. My background covers thirty-three (34) years of experience with Cleaver-Brooks in the steam generating field spanning a broad scope of disciplines including engineering and product sales engineer.

Experience

- Eight (8) years in the role of a Regional Sales Manager / Regional Vice President. Major responsibilities for all customer, financial, product and representative activities in the Midwest and Northeast areas of the USA. Liaison for Cleaver-Brooks authorized representatives in 13 states. Previously covered the Mountain and Pacific areas of the USA with responsibility for 16 states.
- Seven (7) years in the role of a Firetube Product Sales Engineer. Major responsibilities were to work with our representatives on application engineering, specification review, pricing of quotes, and working with our manufacturing facilities on design and application of product offerings.
- Nineteen (19) years in various Engineering related positions related to electrical and mechanical design. Various positions were as an electrical drafter, supervisor of the respective drafting departments, technical coordinator for all five (5) drafting departments located at the manufacturing facilities and processor for bills of materials.

THE HABEGGER CORPORATION is currently seeking applicants for various open positions including:

Inside Sales Engineer (Cincinnati Location) – Inside Sales Engineering position is an entry level position to support both internal and external customers. Bachelor's Degree in Engineering required. Position will provide technical support and pricing to customers for Habegger represented products. Career path for this particular position would lead to an outside Sales Engineer position calling on contractors, consulting engineers, and owners in local market. Recent college graduate or minimal industry experience acceptable.

Sales Engineer Focused on Consulting Engineers and Owners - (Cincinnati and Dayton Coverage Area) – Position will provide application and design support for Habegger represented products to consulting engineering firms. This position will also actively call on end users to understand their business needs and provide HVAC equipment solutions. Sales activities will include: Lunch and learn presentations, customer training, customer events, and factory trips. Design experience with applied/commercial HVAC products desired.

Commercial Service Manager (Cincinnati and Dayton Coverage Area) - Provide Technical Support for complete line of Commercial HVAC products and controls including chillers and air handling units. Facilitating resolutions to customer issues including product warranty. Assisting in the development and presentation of formal training programs for customers and internal personnel.

Please refer inquires to Brian Isaacs at brianisaacs@habeggercorp.com. Phone 513-612-4739

AMERICAN SOCIETY OF HEATING, REFRIGERATING AND AIR-CONDITIONING ENGINEERS

Immediate past ASHRAE President Lynn G. Bellenger, who served as the first woman president in the Society's 116 year history, passed away Wednesday, Oct. 19. She was president for the 2010-11 Society year, with her term ending in June 2011.

Bellenger, P.E., Fellow ASHRAE, was a recognized expert in energy management, with a strong focus on the need for energy modeling to help create and refine more efficient buildings. She was a partner, Pathfinder Engineers & Architects, Rochester, N.Y.

"We at ASHRAE are greatly saddened by the death of our former president and our friend," Ron Jarnagin, ASHRAE president, said. "Her lifelong passion for engineering excellence resonated within our membership and our industry, inspiring us through her belief that engineers will lead an energy revolution with innovation. Through her service, she showed that there is a path available to all who wish to extend the influence of engineering principles to better serve the world we live in."

As ASHRAE president, Bellenger focused on Modeling a Sustainable World, sharing her thoughts about the role of modeling tools and how all involved in the built environment industry must come together to take advantage of "the rich opportunities for optimizing building performance through a collaborative approach from the beginning."

In an interview last year, Bellenger talked about her involvement in energy efficiency and how much has been put in recent years on the need to save energy.

"One of the cool things about the sustainability movement is that it has ignited a passion in people that is changing the world. That passion has brought a sense of energy and excitement to the industry and attracted people who are committed to designing and operating sustainable buildings. I don't see that changing in the future," she said.

Bellenger is a recipient of an ASHRAE Exceptional Service Award, a Distinguished Service Award, two first-place ASHRAE Technology Awards and the Lincoln Bouillon Membership Award.

She received a Bachelor of Science in mathematics from Principia College and a Master of Science in environmental science from Rutgers University.

Funeral arrangements are private.

If you would like to send your condolences please respond to this email. Messages will be assembled into a remembrance for the Bellenger family.
